SUMMARY

Full-stack Web Developer focused on building scalable, complex web applications with React and Next.js. Worked in a wide range of projects, from personal websites to large-scale applications for critical infrastructure organizations, e-commerce, large corporations, small businesses and study portals. Strong problem-solver who debugs methodically and communicates clearly in team environments. Continuous learner.

SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Next.js, Vue.js, Tailwind CSS, Radix UI, shadcn/ui, Storybook
- **Backend:** PHP, Craft CMS, Laravel, Node.js, REST API, GraphQL
- **Design:** Figma
- **Databases:** MySQL
- **DevOps & Cloud:** Vercel, Git, AWS (S3, SES, IAM, CloudFront)
- **Tools & Platforms:** Asana, Algolia, Intercom, Google Tag Manager (GTM)
- **Testing & Quality:** Jest, Code Reviews, Version Control Workflows
- **Methodologies:** Agile, Scrum, DRY, YAGNI, KISS

WORK EXPERIENCE

Unfolded Digital Agency – Full-stack Web Developer **April 2023 – December 2025**

Dutch digital agency delivering web platforms for mid-to-large corporate clients. Working as part of a small development team, I contributed across the full delivery cycle — from CMS architecture to production deployment — across 60+ simultaneous client projects.

Key achievements:

- Contributed to **60+ production web applications**, primarily using **Next.js, React, and TypeScript as frontend stack**.
- Built **40+ headless CMS solutions** with Craft CMS, connected to frontend data-driven applications via **REST and GraphQL APIs**.
- Deployed & maintained applications on **Vercel with using CI/CD pipelines**, including environment config, preview deployments, and rollback procedures. When a misconfigured deployment broke a client's checkout flow, I diagnosed and reversed the issue **within 30 minutes** without escalation.
- Applied industry-standard development practices including **code review, programming principles**, etc.
- Collaborated closely with designers and other developers through **code reviews and Agile workflows**.
- Worked in a **fast-paced agency environment**, balancing multiple parallel projects with varying requirements.
- Improved performance, SEO, and accessibility across multiple client websites, audited using Lighthouse, and achieved an **average score above 90** — a measurable outcome reported back to clients.

Stichting BATC – Webmaster

May 2019 – April 2023

BATC is a Dutch therapists foundation. As the technical person, I was responsible for all digital infrastructure: the public website, an internal staff dashboard, and ongoing maintenance. The main users were therapists with no technical background, which required clear communication and user-first thinking on every decision.

KEY ACHIEVEMENTS:

- Provided **maintenance** and **support** for existing website
- Designed and developed **new features and layouts** for existing website
- Identified that staff were spending 2+ hours per day on manual reporting in spreadsheets. **Built a Laravel-based internal dashboard** from scratch that automated the reporting workflow, **reducing that time by 25%** and eliminating a recurring source of data entry errors.
- Designed and developed new **corporate website** using **Next.js** framework, focusing on performance and modern UX patterns, achieving **3 times faster workflow**
- Delivered **UI/UX enhancements** to improve usability
- **Collaborated with stakeholders** and therapists as end users to gather feedback and ensure business and design requirements were met.

EDUCATION

Wroclaw University of Science and Technology, Poland

2015 – 2019

Bachelor degree in Computer Science

ADDITIONAL

- **Languages:** English (C1), Dutch (B1), Ukrainian (Native), Russian (C1)
- **Hobbies:** Boardgames, Boxing, Travel
